ABOUT ME

Experienced and hard-working web developer with a flair for creating elegant solutions to complex problems. Developed e-commerce applications, business websites, and even created a web builder to solve the day-to-day problems of non-developers looking to build their website. Proficient with developing customer-focused websites using React (Next.js) as the JavaScript Library, Context API, and Redux as the state management technology and Firebase and Express.js for the backend, storage, and authentication.

PROFESSIONAL EXPERIENCE PROJECTS

- **WEB CRAFTMASTER:**
A web builder I created to help non-developers bring their vision to life without any code needed to be written. Demonstrates skills in state management with Context API, making components editable directly from UI, event handling, and general application statement management. Built with React, Context API, Firebase

- **CYBER GROCERIES**
The blueprint of an e-commerce website built for a client that simulates everything from making a purchase down to choosing the method of delivery. Demonstrates skills in state management, role-based access control, OAuth authentication, and authorization flow, mobile responsiveness, and web security. Built with React, Redux, Express.js, Firebase
