ABOUT ME

Experienced and hard-working web developer with a flair for creating elegant solutions to complex problems. Developed e-commerce applications, and business websites, and even created a web builder to solve the day-to-day problems of non-developers looking to build their website. Proficient with developing customer-focused websites using React (Next.js) as the JavaScript Library, Context API, and Redux as the state management technology, and Firebase and Express.js for the backend, storage, and authentication.

PROFESSIONAL EXPERIENCE

PROJECTS

- **Pixel Shop**
  This is a photo editing application mostly built with Python libraries such as OpenCV, PIL Front built with Jinja is a web template engine. Features include Rotate, Crop Image, Image Effects, etc. Demonstrates skills in image manipulation, computer vision, and working with. Built with Python, Flask, Jinja2
  https://bit.ly/3uPlipR

- **Invoicify**
  Invoicify is the blueprint of a CMRS I built. It can be used to handle invoices, manage project timelines with the Gantt chart, and handle payment of services amongst other things. Demonstrates skills in state management with SWR component styling with style application statement management. Log in with **Email: james@yahoo.com, Password: 1234567.** Built with React, Redux, Express.js, Firebase
  https://bit.ly/3cUlBq1

- **Devine Store**
  This is the blueprint of a clothing store I built for a client. The data used for this application is a sample to demonstrate the structural format of the application, and it simulates everything up to the point of actually making credit card payments. Demonstrates skills in stripe integration, state management with Redux, React in component styling with CSS Module, and SSR with Next.js. . Login with **Email: james@yahoo.com, Password: 1234567** Built with React(Next.js), Context API, Firebase, Mongoose, CSS Module.
